Test Comments: *Corn looked great all season long. Good emergence and plenty of rainfall and lack of excessive heat was making for a great yield. Few days before harvest, a strong storm took a lot of hybrids down to their knees. Harvest went better than expected with a majority of corn going through the combine. Would have rated this plot a 9 out of 10 but due to this storm it will get a 7. (10=Best)*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
