Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.15; non-GMO = \$3.15

Test Comments: *This site looked great at harvest. Plants stood well, with minimal stalk lodging in some hybrids. Eric is very pleased with corn yields here. So far it looks to be his best yielding corn crop ever. Full season products responded to the longer growing season, as no killing frost occurred prior to harvest. While temps were warmer in July and cooler in August, they were moderate all season.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
