**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.90; non-GMO = \$3.90

**Test Comments:** Rain showers in mid April delayed planting until May. Soil conditions were good at planting and emergence was excellent. Summer was cool with sometimes too much rainfall, one shower brought over 6 inches and some nitrogen was probably lost. This plot had a good bit of variability due to the rains and some grass that broke late in the season. Overall rating of the plot is a 6 out of 10. (10=best)

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
