**Test Comments:** From early spring through harvest, the season was wet. Corn looked great all season long but was late to harvest because of lack of mid to late summer heat and wet fields. Corn was still standing good at harvest with mostly tops going down.

**Overall rating of the plot is a 8 out of 10. (10=best)**

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
